asad.bashir2580@gmail.com

Objective
To obtain a full time or part time position working in web development.

PROJECTS

Personal Portfolio
- My own personal website used to host my projects and display my skills.
- www.asadbashir.dev

Movie App
- Built a web app that lets users see upcoming movies, read reviews from others and add movies to watchlist.
- Each movie has its own dedicated page that displays rating, description and associated tags for the movie.
- App was built with the TDBM api that provided all the images and information about the movies.

Blogging App
- A full stack app I built that allows users to create,read,update and delete blogs.
- Fully implemented login/logout feature,sign up for new users and filter blogs by category.
- Dedicated page for each blog where users can comment.
- Express server as by backend api used to handle HTTP requests and communicate to MySql database.

QuickNote
- Sticky note app I built where users can quickly make a note and have it saved in their browser.
- Users can create,read,update and delete sticky notes as well as drag and drop notes anywhere on the page.
- Built with Typescript and Sass
